

Quality WORKING AT HEIGHTS Training IT'S THE LAW!

Need to get into compliance fast?

WHSC CAN HELP!

Falls from heights are the leading cause of worker injury and death in the construction sector. To help put a stop to this unacceptable situation, **new regulatory changes** in Ontario will require employers to ensure untrained or inadequately trained construction workers complete a Ministry of Labour-approved, working at heights training program before they can work at heights and use fall protection equipment and systems. This requirement comes into force **April 1, 2015**. Fall protection includes travel restraint systems, fall restricting systems, fall arrest systems, safety nets and work belts or safety belts.

WHSC *Working at Heights* training was one of the first to receive **MOL approval**. After successfully completing our program, participants receive a WHSC record of training card valid for three years. And because WHSC keeps complete records of all training, WHSC can provide complete training transcripts or replacement cards on request.
