

WHSC Construction Sector Training Programs

We know our training works. More important, so do others. As Ontario's designated occupational health and safety (OHS) training centre we have trained hundreds of thousands of workers, supervisors, joint health and safety committees, health and safety representatives and others over the past three decades. While our training is delivered in every sector of the economy, we also offer a complete line of programs suited for the construction sector. With more than 200 ready to deliver training programs we are well positioned to help your work site comply with the many training requirements mandated by health and safety law. Much of the training we offer can also be used for general workforce training and as part of your overall workplace due diligence strategy.

Many WHSC programs are scheduled to run at various times throughout the year in a community near you. Or, we can work with you to organize the delivery of one or more training programs at your work site or training facility.

Listed below are titles of OH&S training essentials for those employed in the construction sector. For more information, program descriptions and schedules or a copy of our training catalogue visit our website, www.whsc.on.ca or call our toll free line from anywhere in Ontario, **1-888-869-7950**, and ask to speak to a training services representative.

Legislated Training and/or Training for Due Diligence

Applying Ergonomics to Prevent Musculoskeletal Injuries [6 hours]

Basic Certification Training [4 days] *

Hazard Awareness Training

Individual hazard awareness programs are delivered over a three hour session. When bundled, three separate programs can be delivered during a one day session. Each program is designed to satisfy the Part II Certification workplace-specific hazard training requirement. **** Each is also suitable for general workforce training.

Adhesives
 Aluminum
 Asbestos Hazards
 Biological Hazards
 Compressed Gas *
 Confined Spaces *
 Critical Incident and Post Traumatic Stress
 Dust and Fibres
 Electrical Hazards *
 Elevating Devices
 EMFs and Dirty Electricity
 Emergency Preparedness & Pandemic Response Plans*
 Fire and Explosion
 Flammables and Combustibles
 Forklift Trucks *
 Formwork Hazards
 Glass Handling
 Hand Tools *
 Hazardous Waste
 Heat and Cold Stress
 Heavy Mobile Equipment & Traffic Control
 Hours of Work
 Infectious Diseases
 Isocyanates
 Lighting
 Lockout *
