

Certification Part II
WHSC Hazard Modules

Workers Health & Safety Centre

Following completion of *Basic Certification Training*, joint health and safety committee (JHSC) Certification candidates are required to complete *Workplace-Specific Hazard Certification Training*, also known as *Certification Part II Training*.

This training must be approved by the Ministry of Labour (MOL) and delivered by an approved provider. Training must also address at least six hazards that are relevant to the JHSC's workplace. The hazards to be addressed by *Certification Part II Training* should be discussed and selected by the JHSC.

WHSC and all our training options for *Certification Part II* have been approved by the MOL. The WHSC offers more than 60 hazard-specific modules for a more customized approach (see below for more details). Each is designed to build on the knowledge gained in *Basic Certification Training* and apply it to specific workplace hazards with emphasis on measures to eliminate or control exposures. As a second option to ease compliance, workplaces can enroll in one of several WHSC sector programs. These programs address hazards common to the majority of workplaces in a given sector. For a listing of our sector programs please see our product sheet entitled, *Certification Part II – WHSC Sector Programs*.

Regardless, *Certification Part II Training* must also be a minimum of two days in duration. In most cases, this training must be taken within six months of *Basic Certification Training*.

Hazard Awarenesss Training Modules

Adhesives
Agricultural Chemicals in the Food Industry
Aluminum
Anaesthetic Gases
Asbestos
Biological Hazards
Blasting Hazards in Underground Mining Operations
Chainsaw Operator
Compressed Gas *
Confined Spaces *
Conveyor Systems *
Critical Incident and Post Traumatic Stress
Dust and Fibres
Dyes and Fabric Treatment
Electrical Hazards *
Elevating Devices
EMFs and Dirty Electricity
Emergency Preparedness and Pandemic Response Plans *
Ergonomics in Health Care and Social Services
Ergonomics: Recognizing Injuries, Risk Factors and Design Principles
Explosives in Underground Mines
Fire and Explosion
Flammables and Combustibles
Forklift Trucks
Glass Handling
Hand Tools *
Hazardous Waste
Heat and Cold Stress

Certification Part II *cont'd*

WHSC Hazard Modules

Heavy Mobile Equipment
Hours of Work
Indoor Air *
Industrial Lasers
Infectious Diseases
Isocyanates
Lighting Hazards
Lockdown: A Crisis Response
Lockout *
Man-Made Mineral Fibres
Manual Material Handling *
Metalworking Fluids
Molten Materials and Furnace Hazards
Moving Machine Parts *
Mould
Multiple Chemical Sensitivity
Noise *
Office Biohazards: Viruses, Moulds and Bacteria
Office Layout and Design
Office Work Environment
Oxidizing and Reactive Agents
Patient Handling
Personal Protective Equipment *
Pesticides
Power Presses
Pressurized Systems
Propane
Roadway Work
Robotic Machinery
Safety Hazards
Solvents
Spray Painting
Stress in the Workplace
Transportation of Dangerous Goods: Legislated Safety Requirements *
Vehicle Driving Hazards
Vehicle Emissions
Vibration
Walking and Working Surfaces *
Waste Disposal
Water and Ice Rescue
Welding Hazards *
Work Design
Work Organization
Working at Heights Awareness *
Workplace Violence and Harassment **

* *Participant materials are available in French for programs marked with an asterisk. Upon request, any of our training programs are available for delivery by a French-speaking, WHSC-qualified instructor.*

** *A similar training program is available in French.*

Note: To maintain certification status, a certified member of a joint health and safety committee (JHSC) in Ontario must complete a Ministry of Labour (MOL)-approved Refresher program within three years of completing Certification Part II and every three years thereafter. Like all Certification Training, this Refresher program must be delivered by an MOL-approved provider. The WHSC *Certification Refresher Training* is MOL-approved and the WHSC is an approved training provider.
