

Certification Part II

WHSC Hazard Modules

Following completion of *Certification Part I* training, joint health and safety committee (JHSC) Certification candidates are required to complete *Certification Part II* training.

This training must be approved by the Ministry of Labour (MOL) and delivered by an approved provider. Training must also address at least six hazards that are relevant to the JHSC's workplace. The hazards to be addressed by *Certification Part II* training should be discussed and selected by the JHSC.

WHSC and all our training options for *Certification Part II* have been approved by the MOL. The WHSC offers more than 60 hazard-specific modules for a more customized approach (see below for more details). Each is designed to build on the knowledge gained in *Certification Part I* training and apply it to specific workplace hazards with emphasis on measures to eliminate or control exposures. As a second option to ease compliance, workplaces can enroll in one of several WHSC sector programs. These programs address hazards common to the majority of workplaces in a given sector. For a listing of our sector programs please see our product sheet entitled, *Certification Part II – WHSC Sector Programs*.

Regardless, *Certification Part II* training must also be a minimum of two days in duration. In most cases, this training must be taken within six months of *Certification Part I* training.

Hazard Awareness Training Modules

Adhesives
Aluminum
Anaesthetic Gases
Asbestos
Biological Hazards
Blasting Hazards in Underground Mining Operations
Chainsaw Operator
Compressed Gas *
Confined Spaces *
Conveyor Systems *
Critical Incident and Post Traumatic Stress
Dust and Fibres
Dyes and Fabric Treatment
Electrical Hazards *
Elevating Devices

EMFs and Dirty Electricity
Emergency Preparedness and Pandemic Response Plans *
Ergonomics: Basic Principles
Ergonomics in Health Care and Social Services
Explosives in Underground Mines
Fire and Explosion
Flammables and Combustibles
Forklift Trucks
Glass Handling
Hand Tools *
Hazardous Waste
Heat and Cold Stress
Heavy Mobile Equipment
Hours of Work
Indoor Air *

Certification Part II *cont'd*

WHSC Hazard Modules

Industrial Lasers	Power Presses
Infectious Diseases	Pressurized Systems
Isocyanates	Propane Handling, Storage and Use
Lighting Hazards	Roadway Work
Lockdown: A Crisis Response	Robotic Machinery
Lockout *	Safety Hazards
Man-Made Mineral Fibres	Solvents
Manual Material Handling *	Spray Painting
Metalworking Fluids	Stress in the Workplace
Molten Materials and Furnace Hazards	Transportation of Dangerous Goods*
Mould	Vehicle Driving Hazards
Moving Machine Parts *	Vehicle Emissions
Multiple Chemical Sensitivity	Vibration
Noise *	Walking and Working Surfaces *
Office Biohazards: Viruses, Moulds and Bacteria	Waste Disposal
Office Layout and Design	Water and Ice Rescue
Office Work Environment	Welding Hazards *
Oxidizing and Reactive Agents	Work Design
Patient Handling	Work Organization
Personal Protective Equipment *	Working at Heights Awareness *
	Workplace Violence and Harassment **

* *Participant materials are available in French for programs marked with an asterisk. Upon request, any of our training programs are available for delivery by a French-speaking, WHSC-qualified instructor.*

** *A similar training program is available in French.*

Note: To maintain certification status, a certified member of a joint health and safety committee (JHSC) in Ontario must complete a Ministry of Labour (MOL)-approved Refresher program within three years of completing *Certification Part II* and every three years thereafter. Like all Certification Training, this Refresher program must be delivered by an MOL-approved provider. The WHSC *Certification Refresher* training is MOL-approved and the WHSC is an approved training provider.
