

## Construction Sector Training Programs

**We know our training works. More important, so do others.** As Ontario's designated occupational health and safety (OHS) training centre, we have trained hundreds of thousands of workers, supervisors, joint health and safety committees, health and safety representatives and others over the past three decades. While our training is delivered in every sector of the economy, we also offer a complete line of programs suited for the construction sector. With more than 200 ready to deliver training programs we are well positioned to help your work site comply with the many training requirements mandated by health and safety law. Much of the training we offer can also be used for general workforce training and as part of your overall workplace due diligence strategy.

Many WHSC programs are scheduled to run at various times throughout the year in a community near you. Or, we can work with you to organize the delivery of one or more training programs at your work site or training facility.

Here's a partial list of OHS training essentials for those employed in the construction sector.

### Meeting Specific & General Duties to Train

|  |  |
|--|--|
| Certification Part I [3 or 4 days]                         | Propane for CH-02 ROT [6 hours]                            |
| Certification Part II – Construction [18 hours]            | Propane Handling, Storage and Use [6 hours]                |
| Chainsaw Operator [6 hours]                                | Rough Terrain Forklift Operator [8 hours]                  |
| Confined Space Entry in Construction [6 hours]             | Rough Terrain Operator – Mid-Term Evaluation [1 hour]      |
| Construction & Industrial Forklift Operator [9 hours]      | Skid Steer & Mini Excavator Operator [9 hours]             |
| Construction Health and Safety Awareness [6 hours]         | Skid Steer & Mini Excavator Operator – Refresher [6 hours] |
| Construction Rigging & Hoisting – Essentials [14.5 hours]  | Skid Steer Operator [8 hours]                              |
| Construction Rigging & Hoisting – Fundamentals [7.5 hours] | Supervisor Health and Safety Training [6 hours]            |
| Ergonomics: Basic Principles [6 hours]                     | Suspended Access Equipment Installer & Operator [12 hours] |
| Fire Watch [6 hours]                                       | Suspended Access Equipment Operator [7.5 hours]            |
| Forklift Operator [8 hours]                                | Traffic Control [6 hours]                                  |
| Globally Harmonized WHMIS [2-3 hours] *                    | Worker Health and Safety Awareness [3 hours]               |
| Hazardous Waste [12 hours]                                 | Worker H&S Representative – Smaller Workplaces [12 hours]  |
| Lockout (Manufacturing) [6 hours]                          | Working at Heights [6.5 hours] *                           |
| Mini Excavator Operator [8 hours]                          | Working at Heights Refresher [4.5 hours] *                 |
| Powered Elevating Work Platform Operator [8 hours]         | Workplace Inspections [3 hours]                            |
| Powered Elevating Work Platform – Refresher [4 hours]      | Workplace Investigations [3 hours]                         |

## Hazard Awareness Training

Individual hazard awareness programs are delivered over a three hour session. When bundled, three separate programs can be delivered during a one day session. Each program is designed to satisfy the Part II Certification workplace-specific hazard training requirement, where work sites opt to take a more customized approach. Each is also suitable for general workforce training.

|   |  |
|---|--|
| Asbestos                                    | Job Task Analysis                              |
| Biological Hazards                          | Lockout  |
| Compressed Gas                              | Manual Material Handling                       |
| Confined Spaces                             | Moving Machine Parts                           |
| Critical Incident and Post Traumatic Stress | Multiple Chemical Sensitivity                  |
| Documenting Health and Safety *             | Noise  |
| Electrical Hazards                          | Non-fit-tested Respirators – Virtual           |
| Elevating Devices                           | Personal Protective Equipment                  |
| EMFs and Dirty Electricity                  | Physical Hazards                               |
| Emergencies and Pandemics                   | Propane  |
| Ergonomics and MSDs                         | Psychosocial Hazards & Workplace Mental Health |
| Ergonomic Toolbox *                         | Roadway Work                                   |
| Fire and Explosion                          | Safety Hazards                                 |
| Flammables and Combustibles                 | Stress in the Workplace                        |
| Forklift Trucks                             | Transportation of Dangerous Goods              |
| Hand Tools                                  | Vehicle Driving Hazards                        |
| Health and Safety Fundamentals              | Walking and Working Surfaces                   |
| Heat and Cold Stress                        | Water and Ice Rescue                           |
| Heavy Mobile Equipment                      | Welding Hazards                                |
| Hours of Work                               | Work Organization                              |
| Indoor Air                                  | Working at Heights Awareness *                 |
| Infectious Diseases                         | Workplace Violence and Harassment              |

For more information, program descriptions and schedules or a copy of our training catalogue visit our website, **[www.whsc.on.ca](http://www.whsc.on.ca)** or call our toll free line from anywhere in Ontario, **1-888-869-7950**, and ask to speak to a training services representative.

\* Participant materials are available in French for programs marked with an asterisk. Upon request, any of our training programs are available for delivery by a French-speaking, WHSC-qualified instructor.
